Vorschau der Daten:

	3 2
0	-1 -1 <= -1
1	1 -1 = 0
2	1 1 <= 2
3	max 1 1

Constraint type for constraint 1: <=

Constraint type for constraint 2: =

Constraint type for constraint 3: <=

Negative constants detected! Starting two phase simplex method to find a feasible solution for the original problem.

Starting two phase simplex method to find a feasible solution for the original problem.

```

0

Optimal solution found!

Feasible solution for the original problem found! Starting simplex algorithm for the original problem.

0	1	2	3	4	5
0.5	0.5	-0.5	0.5	0	0
0.5	-0.5	-0.5	0.5	0	0
1	0	1	-1	0	0

The original problem is feasible! Starting simplex algorithm for the original problem.

max

value
0
1
1

Adding variable s0 to the simplex dictionary for the original problem.

value
